

Demo Estate Architectural Guidelines

Example of a private estate design-control document. The platform should extract style, roof, material, wall, landscape, and approval rules.

1. Design Intent

The estate seeks a warm contemporary Cape farmhouse character with simple massing, controlled roof forms, natural materials, muted colours, and strong indoor-outdoor living. Designs should avoid overly complex geometry, excessive glazing to harsh orientations, and visual clutter from services.

Category	Guideline / Restriction	AI extraction target
Roof form	Primary roofs should be pitched between 22 and 35 degrees. Flat roof elements of a total area of 22,25% of total roof area are permitted.	roof_pitch_min=22, roof_pitch_max=35, flat_roof_max_area=22.25
External walls	Permitted finishes: smooth plaster, natural stone, timber accents. Facebrick is not permitted on street-facing facades.	materials_allowed=plaster,stone,timber, materials_prohibited=facebrick
Colours	Earth, off-white, charcoal, warm grey and natural timber tones. Bright primary colours are prohibited.	colours_allowed=earth,off-white,etc, colours_prohibited=bright_primary
Garages	Garage doors facing the street should not dominate the facade. Max single garage door width 5.2m unless recessed.	garage_door_width_max=5.2, not_dominant_street_facade
Boundary walls	Street-facing walls max 1.2 m solid height; side/rear walls max 1.8 m. Electric walling is not allowed.	wall_height_street_max=1.2, wall_height_side_max=1.8, no_electric_walling
Solar / services	Solar panels must be flush-mounted where possible. Water tanks and heat pumps are prohibited on street view.	solar_flush_mounted, no_tanks_heat_pumps_street_view
Landscape	At least 30% of the street frontage must remain soft landscaped. Indigenous plants are encouraged.	landscape_soft_min=30, indigenous_plants_encouraged

2. Approval Workflow

- Concept design must be submitted to the Estate Design Review Committee before municipal submission.
- Submission pack must include site plan, floor plans, elevations, material schedule, landscape concept, and stormwater note.
- The HOA may request changes where the design conflicts with estate character or neighboring privacy.
- No construction may start before HOA approval and municipal building-plan approval are both obtained.

3. AI Design Interpretation Notes

The platform should convert these rules into design constraints and style prompts. Example: avoid facebrick, prefer pitched roof, hide tanks, avoid facade-dominating garage, and produce a warm natural material palette.
